

Press Release April 24, 2017

WAVEFRONT'S POWERWAVE TECHNOLOGY TO DRIVE PRODUCTION ENHANCEMENT WITH MIDDLE EAST OPERATOR

EDMONTON, Alta., April 24, 2017 Wavefront Technology Solutions Inc. (Wavefront or the Company, TSX-V: WEE; OTCQX: WFTSF) an Oil Field Service (“OFS”) provider focused on enhancing hydrocarbon recovery through the lifecycle of a production asset is pleased to announce that broader field deployment of Wavefront’s core fluid injection technology, Powerwave, will be undertaken in the Sultanate of Oman.

A Powerwave-driven waterflood targets stranded or bypassed oil in a reservoir which is very difficult to produce due to various physical limitations. Based on positive results from a limited field trial of Powerwave Wavefront’s distribution partner in Oman was awarded the approximate US \$500,000 contract for expanded Powerwave use. This previously anticipated Powerwave program was delayed due to lower and volatile oil prices over the past few years. Powerwave deployment is in the client’s scheduling phase and is anticipated to commence in the second half of calendar 2017.

“Wavefront is confident it can replicate or better initial field pilot results which saw oil production decline rates fall by approximately 4% and overall oil production rates within the field pilot area improve by up to 47%,” said Wavefront President and CEO Brett Davidson. “We believe that demonstrating Powerwave efficacy on a broader scale across varied geological settings will result in general commercialization of Powerwave with this client.”

ON BEHALF OF THE BOARD OF DIRECTORS

WAVEFRONT TECHNOLOGY SOLUTIONS INC.

“D. Brad Paterson” (signed)

D. Brad Paterson, CFO & Director

About Wavefront:

Wavefront is a technology based world leader in fluid injection technology for improved/enhanced oil recovery and groundwater restoration. Wavefront publicly trades on the TSX Venture Exchange under the symbol WEE and on the OTCQX under the symbol WFTSF. The Company's website is www.onthewavefront.com.
