Wavefront Energy and Environmental Services Inc.
- Successful Results of Pressure Pulse Technology with Consolidated Edison -

EDMONTON, Alta March 23/ Wavefront Energy and Environmental Services Inc. (the "Company"), a provider of innovative technologies for fluid flow optimization and monitoring processes, is pleased to announce it successfully implemented of Wavefront's Pressure Pulse Technology ("PPT") at Consolidated Edison's Maspeth Substation in Queens, NY.

The one-week pilot study was used to evaluate the efficacy of PPT, combined with water injection, to increase the recovery of a groundwater contaminant. Initial results indicated that the application of PPT increased recovery of contaminant in a number of wells. Additionally, in adjacent monitoring wells where historically contaminant has never been measured or measured with infrequency there were increased containment levels.

Mr. Brett Davidson, President and CEO of Wavefront commented, "We have long understood that PPT would be beneficial in the mobilization of liquids, which increases the rate and amount of oil and contaminants that can be extracted from the ground." The results generated at Queens, NY affirm what the company has been marketing to stakeholders in both the environmental and energy sectors. Successful projects with such clients as Consolidated Edison reflect positively in the marketplace and will allow Wavefront to further penetrate the market especially in the utility industry. We are confident that these results will be used by the client as a bench mark for evaluating installations at other Consolidated Edison sites and discussion with third party consultants have commenced in this respect."

About Wavefront Energy and Environmental Services Inc.

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company's *Pressure Pulse Technology* for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, PPT accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly. Wavefront trades on the TSX Venture Exchange under the symbol WEE and the Company's website is www.onthewavefront.com.
