**WAVEFRONT ENERGY & ENVIRONMENTAL SERVICES INC.**  
- WAVEFRONT COMPLETES COAL BED METHANE MONITORING IN CHINA &  
AMENDS TERMS OF SHORT FORM OFFERING DOCUMENT -

EDMONTON, AB – March 25, 2004, Wavefront Energy & Environmental Services Inc. (“Wavefront”) [TSXV: WEE], a provider of innovative technologies for fluid flow optimization and monitoring processes, is pleased to announce that the Company has successfully completed a coal bed methane monitoring project in Quinshu, China. The program, completed under contract for the Alberta Research Council, involved the deployment of downhole sensors to monitor reservoir and pump pressures.

Brett Davidson, President of Wavefront commented “there is significant emphasis being placed on coal bed methane by the oil and gas industry in North America and abroad. In Alberta alone hundreds of wells are anticipated to be drilled in the coming year and many of these will be instrumented with equipment similar to what Wavefront deployed in China. Having a cost effective and proven system set of large-scale commercialization represents a considerable advantage for the Company and we will be aggressively pursuing opportunities in this multi-million dollar market space.”

The Company also wishes to announce an amendment to the Company’s \$2,000,000 financing by way of short form offering document and a concurrent brokered private placement with accredited investors (together the “Offering”) as previously announced by news release dated January 23, 2004. Wavefront, subject to regulatory approval, has agreed to amend the price per unit from \$0.42 per unit to \$0.35 per unit and to amend the warrant price from \$0.60 to \$0.55. The Offering will now be for a minimum of 2,142,857 Units to a maximum of 5,714,286 Units at \$0.35 per unit, for gross proceeds of between \$750,000 to \$2 million. Each Unit is to consist of one Common Share of the Company and one half of one Share Purchase Warrant, each full Share Purchase Warrant exercisable at \$0.55 for a period of one year from the date of closing.

***About Wavefront Energy and Environmental Services Inc.***

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company’s *Pressure Pulse Technology* for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, PPT accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly. Wavefront trades on the TSX Venture Exchange under the symbol WEE. Additional information on the Company and *Pressure Pulsing Technology* can be accessed at: [www.onthewavefront.com](http://www.onthewavefront.com).
