TSX-V: WEE

**WAVEFRONT ENERGY & ENVIRONMENTAL SIGN  
LEASE AGREEMENT FOR OIL AND GAS DEVELOPMENT**

EDMONTON, Alta March 21, 2005/ Wavefront Energy and Environmental Services Inc. (the "Company"), a provider of innovative technologies for fluid flow optimization and monitoring processes, announces it has completed its due diligence and signed the lease agreement for the oil and gas mineral rights for the Milam County, Texas property as published in December 2004.

Brett Davidson, President and CEO of Wavefront, said: "Closing the lease agreement for the Milam property is a momentous step forward in the evolution of the Company as it continues to unfold its corporate strategy to maximize the value of PPT in the oil sector. Ultimately, the benefit of using PPT in Milam is to gain sizeable production results to increase market penetration of the technology within the industry. Given current oil price levels and the advantages of PPT, the Company looks forward to a positive upside. We anticipate further announcements in the near future with respect to other oil field prospects currently under evaluation."

The Company also wishes to announce that Wavefront and Halliburton have completed "yard" testing of systems from Halliburton's tools portfolio as published in January 2005. Testing, performed the week of March 7, 2005 saw positive results in the advancement of a PPT system suited for well intervention. Wavefront is currently evaluating data collected during the yard tests. Management of the Company and Halliburton will shortly be identifying candidate locations and field-testing the resulting "yard" tested system.

***About Wavefront Energy and Environmental Services Inc.***

Wavefront develops, markets, and licenses proprietary technologies in the energy and environmental sectors. The Company's *Pressure Pulse Technology* for fluid flow optimization has been demonstrated to increase oil recovery. Within the environmental sector, PPT accelerates contaminant recovery and improves in-ground treatment of groundwater contaminants thereby reducing liabilities and restoring the site to its natural state more rapidly.
