WAVEFRONT ENERGY & ENVIRONMENTAL SERVICES INC.

ALBERTA POWERWAVE PROJECT TO BE EXPANDED

EDMONTON, Alta Mar 17, 2008/ Wavefront Energy and Environmental Services Inc. ("Wavefront"), a leader in technology development and implementation for improved oil recovery and optimized groundwater remediation is pleased to announce that the Powerwave program which has been on-going since October 2007 with an international oil producer in Alberta has entered the commercial phase and will be expanded by multiple systems. For reasons of confidentiality production results, customer name, and oil field location can not be released.

Wavefront President and CEO Brett Davidson stated, "This is a notable accomplishment for Wavefront and further validates its game changing technology, Powerwave. Results from the current installations substantiate Powerwave's impact on the production of stranded oil and we are very gratified to see the existing program being expanded by multiple systems. Extension of the Powerwave program by the client stems from efficiencies the process has generated to date. The implementation schedule for the commercial phase of the program is being determined for the oil field that currently has over two hundred water injection wells."

Mr. Davidson further commented, "Wavefront continues to amass a growing list of companies adapting Powerwave to access stranded oil to positively affect natural production decline, extend field life, and increase ultimate oil recovery from an oil field. We anticipate additional announcements on Powerwave implementation, and adaptation in the near term."

About Wavefront Energy and Environmental Services Inc.

Wavefront is a technology-based company with a focused, strategic plan to leverage the value of our intellectual property in order to maximize oil production recovery operations, as well as provide additional solutions for environmental applications.
