WAVEFRONT ENERGY & ENVIRONMENTAL SERVICES INC.

FOUR POWERWAVE™ SYSTEMS TAKEN BY ENERGY TRUST

EDMONTON, Alta June 10, 2008/ Wavefront Energy and Environmental Services Inc. ("Wavefront"), a world leader in fluid injection technology for improved/enhanced oil recovery and groundwater restoration is pleased to announce that a major Canadian conventional oil and natural gas energy trust will install four Powerwave systems in a mature waterflood development. Based on production improvements, the client envisions full-field implementation of approximately one hundred injection wells. The implementation schedule for the initial four Powerwave systems is being determined.

Wavefront President and CEO Brett Davidson stated, "The goal of this Powerwave program is to improve "sweep efficiency", which is the ability of our technology to provide more uniform distribution of the injected water to mobilize stranded oil. In mature waterfloods much of the recoverable oil is produced at very high water fractions (i.e. about 90% water per barrel of fluid). Lowering the water fraction hence increasing the oil fraction not only improves oil productivity rates but also contributes to changing the rate of production decline, extending field life and increasing proven reserves. Previously reported results for an on-going project in Alberta demonstrate Powerwave's ability to mobilize stranded oil with an increase in oil fraction from 3.0% to 4.6%. As disclosed in Wavefront's May 20, 2008 news release, the positive change in oil fraction equates to an increase in oil recovery of 57 barrels of oil per day. With positive results seen elsewhere Wavefront is very optimistic of field-wide expansion in this new project."

About Wavefront Energy and Environmental Services Inc.

Wavefront is a technology-based company with a focused, strategic plan to leverage the value of our intellectual property in order to maximize oil production recovery operations, as well as provide additional solutions for environmental applications.

Cautionary Disclaimer – Forward Looking Statements

Certain statements contained herein regarding Wavefront and its operations constitute "forward-looking statements" within the meaning of Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995. All statements that are not historical facts, including without limitation statements regarding future estimates, plans, objectives, assumptions or expectations or future performance, are "forward-looking statements". In some cases, forward-looking statements can be identified by terminology such as "may", "will", "should", "expect", "plan", "anticipate", "believe", "estimate", "predict", "potential", "continue" or the negative of these terms or other comparable terminology. We caution that such "forward-looking statements" involve known and unknown risks and uncertainties that could cause actual results and future events to differ materially from those anticipated in such statements. Such factors include fluctuations in the acceptance rates of Wavefront's Powerwave and Primawave Processes, demand for products and services, fluctuations in the market for oil and gas related products and services, the ability of Wavefront to attract and maintain key personnel, technology changes, global political and economic conditions, and other factors that were described in further detail in Wavefront's continuous disclosure filings, available on SEDAR at www.sedar.com. Wavefront expressly disclaims any obligation to up-date any "forward-looking statements", other than as required by law.
