**WAVEFRONT TECHNOLOGY SOLUTIONS INC.**

**PEMEX POZA RICA-ALTAMIRA ASSET APPROVES POWERWAVE STIMULATIONS  
WAVEFRONT TO CONDUCT FIVE SINGLE WELL POWERWAVE STIMULATIONS**

EDMONTON, Alta Jan 13, 2010/ Wavefront Technology Solutions Inc. (“Wavefront”), a world leader in providing innovative solutions for increasing oil field production and enhancing the treatment of contaminated groundwater, is pleased to announce that the Activo Integral Poza Rica-Altamira an oil production asset of Pemex, has approved five single well Powerwave stimulations pursuant to the non-binding Letter of Intent announced October 27, 2009. The Activo Integral Poza Rica-Altamira well stimulations represent the continuation of an extensive Powerwave undertaking with Pemex. The Activo Integral Poza Rica-Altamira has scheduled stimulation work to commence in early February in the Tampico region.

Pemex is currently recovering 7 per cent of the original volume of the Chicontepec field with its 139 billion barrels of oil. On February 17, 2009, Mr. Carlos Morales Gil, then General Manager of Pemex, announced that with the current technology, only an estimated 18 billion barrels could be recovered. When asked about the rest of the reserves he responded, “It will stay there because at this moment there is no technology that will allow us to extract that reserve.”

“This is a very important step in the continuation of the relationship between Wavefront and Pemex,” said Wavefront President and CEO Brett Davidson. “Pemex has indicated to Wavefront that its longer term intent is to use Powerwave in the Chicontepec field to help Pemex recover reserves that would otherwise remain unrecoverable. We see this as a significant vote of confidence in the performance of Powerwave.”

Wavefront would also like to announce that the first of four Powerwave single well stimulations announced in December 2009 for the Samaria-Luna oil production asset of Pemex was successfully completed. Production results related to the stimulation work are pending. The remaining Powerwave stimulation work is imminent.
