**WAVEFRONT ENERGY AND ENVIRONMENTAL SERVICES INC.
COMPLETES ACQUISITION OF TOP GUN SAND PUMPS & RENTALS**

EDMONTON, Alta Mar 05, 2007/ Wavefront Energy and Environmental Services Inc. ("Wavefront"), a leader in technology development and implementation for improved oil recovery and optimized groundwater remediation is pleased to announce that it has completed the acquisition of (the "Acquisition") all of the issued and outstanding shares of Top Gun Sand Pumps & Rentals Ltd. ("Top Gun"), an arms length, privately held Saskatchewan company.

Top Gun has been in operation since 1995 as an oil service company in the heavy oil industry, operating primarily in western Canada. Top Gun offers rentals and sales of sand pumps and associated well bore pumping and cleaning equipment. The sand pumps offered by Top Gun are known as Continuous Sand Extraction Systems ("CSES"). The CSES approach is an established alternative to conventional pumping equipment for use in heavy oil wells that exhibit chronic plugging from debris such as shale, pyrite, coal, waxes, etc. The CSES method reduces, and in some cases prevents, plugging from occurring resulting in wells going from zero or very low volumes of oil production to production levels where the wells are considered economic successes.

Top Gun's management reported, unaudited, consolidated revenue of \$810,577 with net income (before taxes) of \$223,989 for the six months ending January 31, 2007. For fiscal year ended July 31, 2006 Top Gun's management reported, unaudited, consolidated revenue of \$1,179,798 earnings with net income (before taxes) of \$203,300.

Total consideration for the Acquisition was One Million Two Hundred Thousand Dollars (CN \$1,200,000) (the "Purchase Price"). Of the total Purchase Price, Wavefront paid \$600,000 cash and issued 600,000 common shares (the "Shares") in the capital of Wavefront at a deemed price of \$1.00 per share. No finders' or similar fees were paid in connection with the transaction. In accordance with TSX Venture Exchange policies, the Shares will be subject to a "hold period" of four months plus one day expiring on July 2, 2007. Although not required by Exchange policies, Top Gun's principals have agreed to place the Shares in escrow pursuant to an escrow agreement, utilizing a surplus securities release structure which entails periodic release over three years from the date of closing.

In addition, all Top Gun shareholder loans, debts and accrued interest were restructured as unsecured and non-interest bearing, to be repaid over three (3) years.

Furthermore, to coincide with the Wavefront brand Top Gun's name will shortly be changed to Wavefront Sand Pumps & Rentals Ltd., with the by-laws, articles, and share capital remaining unchanged.

Wavefront President and CEO Brett Davidson stated, "We are pleased to have closed the acquisition of Top Gun which management believes is poised for considerable growth given its established track record of performance in resurrecting oil production in problematic wells. There is no question that the CSES approach is a valuable asset to heavy oil production and its use will further expand with continued development in the global heavy oil sector. Wavefront plans to enlarge Top Gun's current operations to gain greater market penetration in western Canada as well as internationally."

Mr. Davidson further commented, “With the addition of Top Gun, the proposed acquisition of ICI Solutions (www.ici.ca), and our existing Powerwave™ Process Wavefront is well positioned to offer a solid, proven suite of patented technologies to address two of the toughest problems in the oil industry: improved production and greater ultimate oil recovery. The technology strengths of Wavefront’s integrated group of companies will better serve mutual clients and create new opportunities for growth. As we look to add further oil properties through acquisition and partnerships we can do so confidently knowing we have key technologies to maximize oil production and build shareholder value.”

About Wavefront Energy and Environmental Services Inc.

Wavefront is a technology-based company with a focused, strategic plan to leverage the value of our intellectual property in order to maximize oil production recovery operations, as well as provide additional solutions for environmental applications.
